

# Herzlich Willkommen bei Inf-Einf-B Woche 6.

Heute sehen wir uns **Python** an. Dies wird in unserem Kurs die *einzige* Vorlesung sein, in der wir Python an sich behandeln.

Am 6.1.25 findet keine Vorlesung statt, aber es gibt Übungen und Shorts zu weiterführenden Konstrukten von Python. Nächste Vorlesung: 13.1.25 zu HTML/CSS/JavaScript.

An dieser Stelle weichen wir von CS50 ab – einige Inhalte gibt es nur in den Shorts und in den Übungen, aber nicht hier in der Vorlesung.

Erste Shorts sind morgen online, weitere folgen diese Woche und Anfang des neuen Jahres.

Übungen zeigen erst, wie bereits bekannte Aufgaben aus C in Python gelöst werden. Darauf folgen komplexere Aufgaben u.a. zu objektorientierter Programmierung, die mehr Eigeninitiative erfordern – auf Shorts warten und erst diese anschauen!

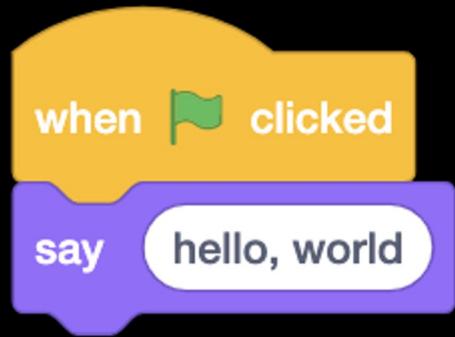

Langsam auch relevant: **Ideen für Abschlussprojekt** erarbeiten und gerne mit mir oder Tutoren besprechen.

Interesse an Hackathon am 31.1.25?

Vorstellung auf Messe am 3.2.25.

# This is CS50

Dies ist Inf-Einf-B.

```
#include <stdio.h>

int main(void)
{
    printf("hello, world\n");
}
```

```
print("hello, world")
```

```
make hello
```

```
./hello
```

```
clang -o hello hello.c -lcs50
```

```
./hello
```

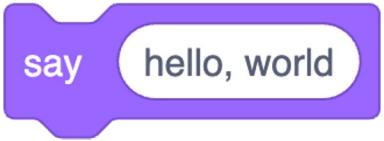

```
python hello.py
```

# Funktionen

say

hello, world

say

hello, world

```
printf("hello, world\n");
```

say

hello, world

```
print("hello, world")
```

# Bibliotheken

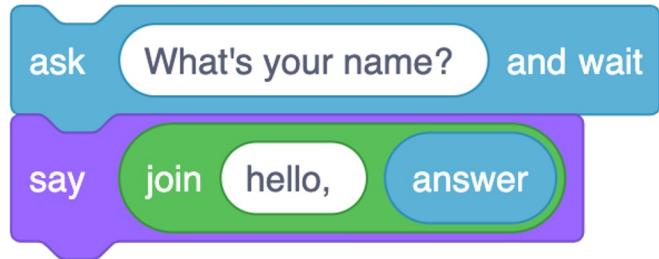

```
#include <cs50.h>
```

```
import cs50
```

```
from cs50 import get_string
```

ask What's your name? and wait

say join hello, answer

```
string answer = get_string("What's your name? ");
printf("hello, %s\n", answer);
```

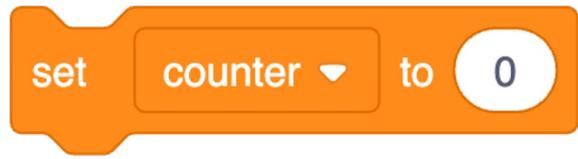

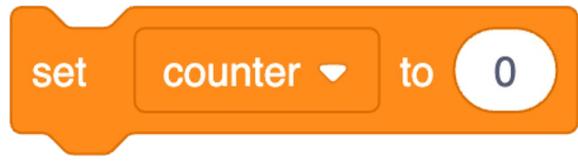

```
answer = get_string("What's your name? ")
print(f"hello, {answer}")
```

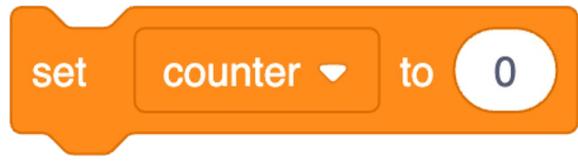

```
answer = input("What's your name? ")
print(f"hello, {answer}")
```

# Variablen

```
int counter = 0;
```

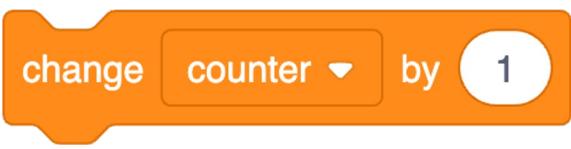

counter = 0

change

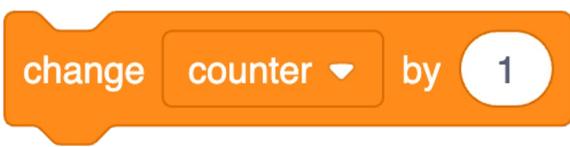

counter ▾

by

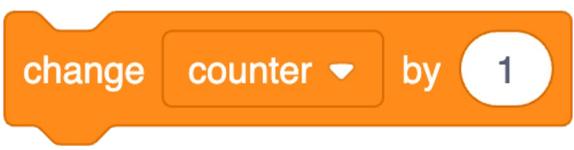

1

```
counter = counter + 1;
```

```
counter = counter + 1
```

counter += 1
